Profile

Engineering student in computer science and networks, specializing in cybersecurity at EMSI. Focused on offensive security, secure software development, and the security challenges of AI-integrated systems. Currently a cybersecurity intern at YAZAKI Morocco, working on risk prevention for an internal AI platform. Seeking internships and opportunities in offensive and defensive security.

Education

EMSI — Moroccan School of Engineering Sciences *2025 – 2026*
Engineering Cycle in Computer Science and Networks

ISTA NTIC, Hay Riad *2022 – 2024*
Full Stack Digital Development

Experience

YAZAKI Morocco — Cybersecurity Intern, AI Platform Risk Prevention *Since July 2026*
- Risk prevention and secure-usage practices for an internal AI platform: usage governance, security controls, and identifying misuse risks specific to AI-assisted workflows

VOVE ID — Frontend Developer (Intern) *July – August 2025*
- Modernized the showcase website and internal dashboard with React and Next.js; reusable dashboard components and Figma mockups turned into pixel-accurate interfaces (remote, Baobab '24 cohort)

Safran Electrical & Power — Python Developer (Intern) *May 2024*
- Python tools for stock management and internal operations, on-site in an industrial engineering environment

Skills

Security & Testing — Burp Suite (learning), Kali Linux, OWASP Top 10, Nmap, SNMP

AI Security — LLM Auditing, Prompt Injection, OWASP LLM Top 10, MITRE ATLAS

Network & Infra — pfSense, Proxmox, VirtualBox, Zabbix, Segmentation

Programming — Python, Java, C++, PHP, JavaScript/TypeScript, Bash

Web — React, Next.js, Laravel, Django, FastAPI, Node.js

Systems & DevOps — Linux (Kali/Ubuntu/RHEL), Git, Docker, CI/CD

Data & Monitoring — MySQL, MongoDB, PostgreSQL, Neo4j, ELK Stack, Prometheus/Grafana

Projects

SecureWatch — Security Monitoring Platform (Capstone) *Python, ELK, Prometheus, Grafana, Docker*
- Self-hosted stack: log centralization, real-time incident detection, geographic attack map
- Self-audited and hardened: 10 vulnerabilities identified and fixed (JWT bypass, stored XSS, unauthenticated exposures)

SentinelLLM — LLM Security Auditing Platform *FastAPI, PostgreSQL, Celery, React, TypeScript*
- Structured red-team tests (prompt injection, jailbreaks) mapped to OWASP LLM Top 10 and MITRE ATLAS, exportable PDF reports; integrations with OpenAI, Azure OpenAI, Mistral, Ollama

Network Inventory & Monitoring Platform (EMSI) *VirtualBox, Nmap, SNMP, Zabbix, PostgreSQL*
- Self-monitoring virtual network: automatic device discovery in under a minute, automatic alerting

Secure E-commerce Platform · Real-Time Face Recognition *Laravel · Django, OpenCV*
- Laravel storefront with secure authentication and role management; Django app for real-time facial detection and identification

Certifications

Red Hat Linux Administration RH124 (Honoris) · **Python for Data Science, AI & Development** (IBM) · **Agile Project Management** (Google) · **Software Engineering: Software Design and Project Management** (HKUST)

Languages

Arabic (Fluent) • French (Intermediate) • English (Intermediate)
